How to Run MirageOS on TI-NSpire

This guide will assist you to make MirageOS with your TI-NSpire.

Written By: John Baek

INTRODUCTION

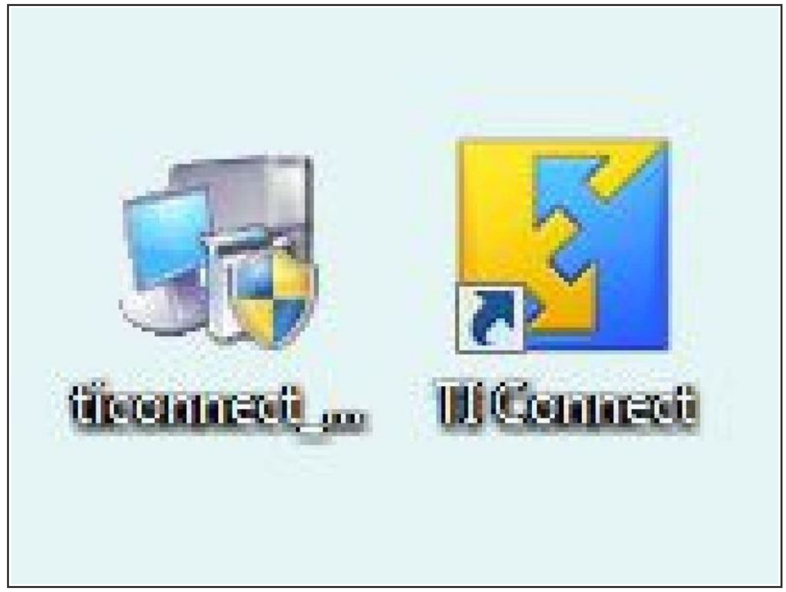

MirageOS is one of the most popular programs for the TI-84, as it is the OS that allows you to play numerous different types of games. However, it is not compatible with the TI-NSpire; at least not without some tweaks.

TOOLS:

- TI Calculator Link Cable (1)

Step 1 — How to Run MirageOS on TI-NSpire

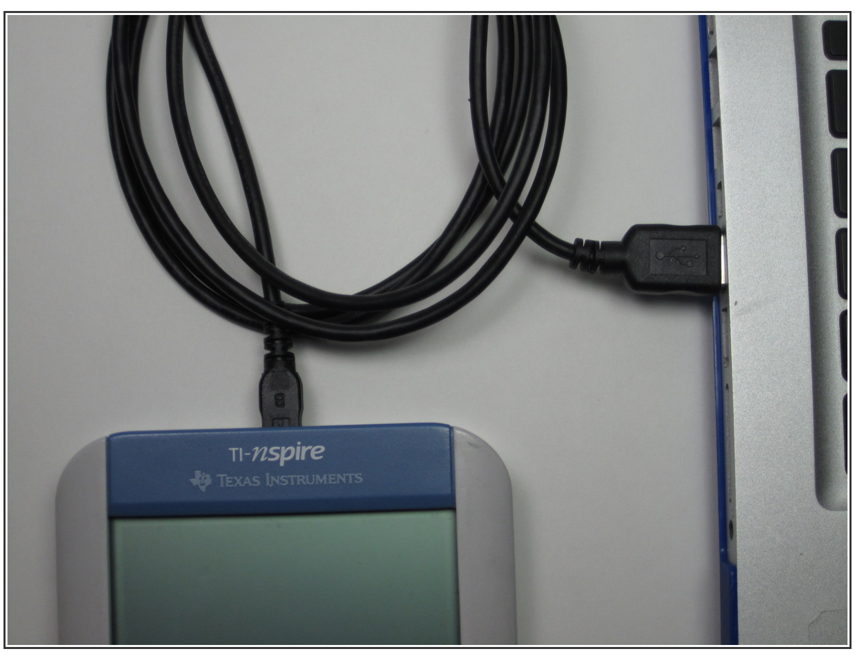

- Download the latest version of MirageOS and the latest version of MOSPATCH onto your computer.
- And if you do not already have it, the TI-NSpire connectivity software.

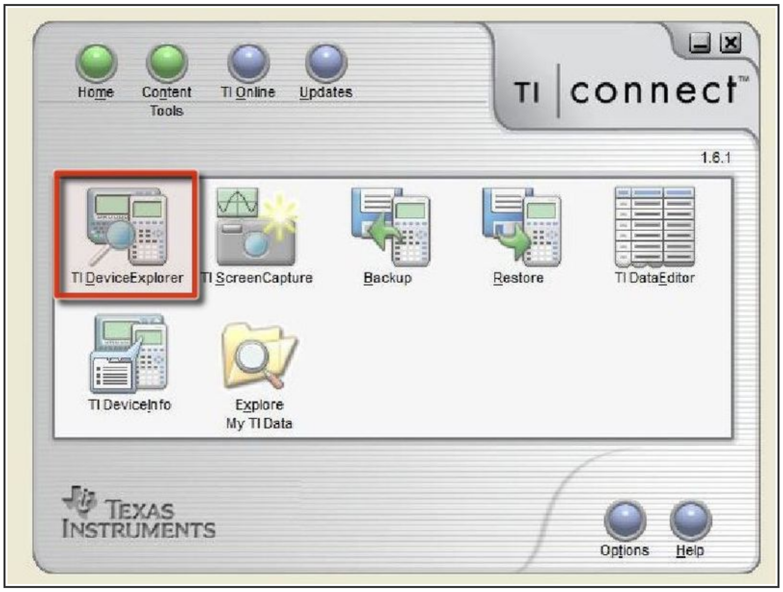

Save the files in a place you can access easily, preferably the desktop.

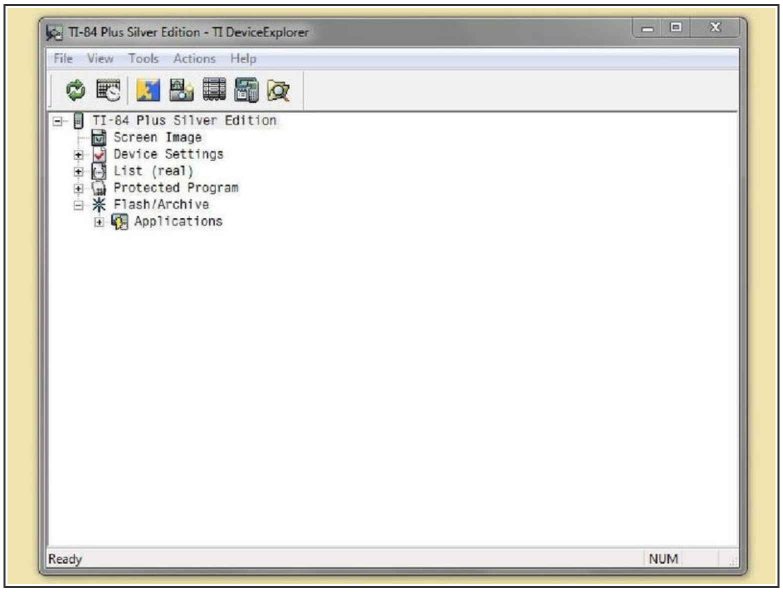

Step 2

- Connect your TI-NSpire to your computer using the TI Calculator Link Cable.

Step 3

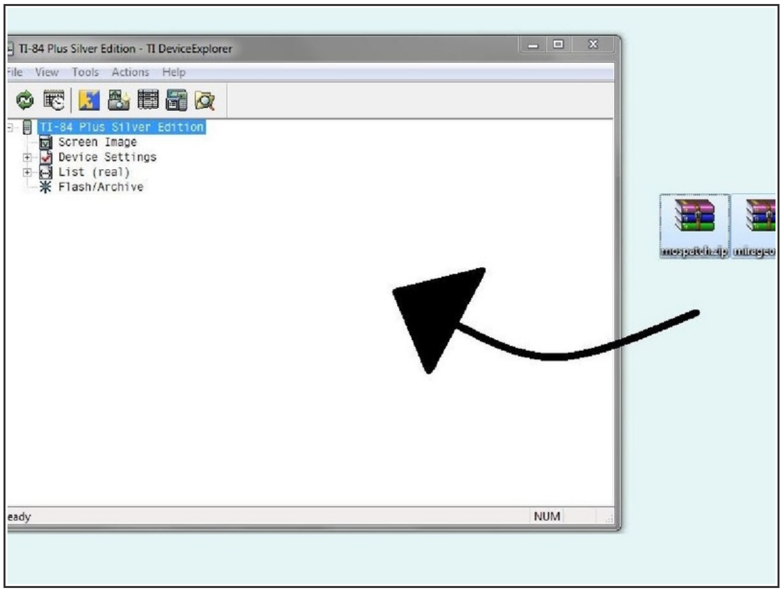

- Open TI Connect and double click "TI DeviceExplorer."
- A new window named Device Explorer will open.

Step 4

- Highlight the files mospatch.zip and mirageos.zip and drag them into the DeviceExplorer window.

Step 5

- Now on your calculator, bring up the catalog by pressing 2nd + 0 (catalog).
- Press the down arrow key to scroll down to the "Asm(" function (the last item) and press "ENTER".
- Press PRGM, select MOSPATCH using the arrow keys, and press "ENTER".

Step 6

- The calculator should now display "Asm(prgmMOSPATCH".
- Press "ENTER". The calculator will display "DONE" indicating that you can now run MirageOS on your TI-NSpire!

Now that you have MirageOS running on your TI-NSpire, download some games and try them out! http://www.ticalc.org/pub/83plus/asm/gam...
